特徴

WAC contains a WW domain, which is a protein module found in a wide range of signaling proteins.

This domain mediates protein-protein interactions and binds proteins containing short linear peptide motifs that are proline-rich or contain at least one proline.

This gene product shares 94% sequence identity with the WAC protein in mouse, however, its exact function is not known.

Applications: Suitable for use in Western Blot, Flow Cytometry (Not Tested), FLISA

Recommended Dilution: FLISA: 1:1,000 Western Blot: 1:100-500
