特徴

SGSH is one of several enzymes involved in the lysosomal degradation of heparan sulfate.

Mutations in this gene are associated with Sanfilippo syndrome A, one type of the lysosomal storage disease mucopolysaccharidosis III, which results from impaired degradation of heparan sulfate.

Transcripts of varying sizes have been reported but their biological validity has not been determined.

Applications: Suitable for use in Western Blot and FLISA.

Other applications not tested.

Recommended Dilutions: Optimal dilutions to be determined by the researcher.

Storage and Stability: Store product at 4°C in the dark.

DO NOT FREEZE! Stable at 4°C for 12 months after receipt as an undiluted liquid.

Dilute required amount only prior to immediate use.

Further dilutions can be made in assay buffer.

Caution: APC conjugates are sensitive to light.

For maximum recovery of product, centrifuge the original vial prior to removing the cap.

Note: Applications are based on unconjugated antibody.

仕様

Size: 200ul

Host: rabbit

Source Antibody: human

Grade: Affinity Purified

Purity: Purified by Protein A and peptide affinity chromatography.

Form: Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide and a stabilizer. Labeled with Allophycocyanin (APC).

Specificity: Recognizes human SGSH.

Isotype: IgG

Calc Applications Abbrev: FLISA WB

Calc Crossreactivity: Hu

Immunogen: KLH-conjugated synthetic peptide mapping to a fragment of residues with in amino acids 420-449 in the C-terminal of human SGSH. Cellular Localization: Lysosome.

Shelf Life: 6 months

Swiss Prot Number: P51688

EU Commodity Code: 30021010
