

US Biological(nonantibody)

1-(2,6-diethyl)octylbenzene 1mg

特徴

1-(2,6-diethyl)octylbenzene is an impurity of Fingolimod (F805000), also known as FTY720. FTY720 is a derivative of ISP-1 (myriocin), a fungal metabolite of the Chinese herb Iscaria sinclarii as well as a structural analogue of Sphingosine. FTY720 is a novel immune modulator that prolongs allograft transplant survival in numberous models by inhibiting lymphocyte emigration from lymphoid organs. FTY720 is reported to be phosphorylated by sphingosine kinase to FTY720-P, which has been shown to potently stimulate GTPγS binding activity in S1P-transfected CHO cells (EC₅₀ = 210 pM, 4.9 nM, 4.3 nM, and 1 nM for S1P1, S1P3, S1P4 and S1P5, respectively).

Molecular Formula:C16H25I

Molecular Weight:344.27

Storage and Stability:Store at -20°C. For maximum recovery of product, centrifuge the original vial prior to removing the cap.
